Justine Tobithe L. Doloiras

Full Stack and Mobile Developer | Laravel, Next.js, Flutter, React Native

Davao City, Philippines | +63 927 434 6936 | justine.tobithe27@gmail.com
Portfolio: jah-xi.vercel.app | GitHub: github.com/justinetobithe

PROFESSIONAL SUMMARY

Full stack developer with 7+ years of experience designing, building, deploying and maintaining web applications and APIs. Strong in Laravel (PHP) back ends and Next.js, React and Vue.js front ends, with mobile app development in Flutter (Dart) and React Native for iOS and Android. Experienced in shipping production systems end to end, including REST APIs, authentication, third party integrations, Docker based deployments on VPS and cloud servers, and client facing delivery for international teams. Works independently, communicates clearly in English, and turns requirements into reliable, maintainable features.

CORE SKILLS

Back end: Laravel, PHP, REST API design, Laravel Sanctum, authentication and authorization, Google OAuth sign in, queues and mail

Front end: Next.js, React, Vue.js, JavaScript, HTML, CSS, NextAuth, responsive UI, UI/UX design

Mobile: Flutter, Dart, React Native, Android Studio, iOS and Android app development, cross platform mobile UI, REST API integration, user authentication, push notifications, local storage

DevOps and hosting: Docker, Docker Compose, Linux VPS deployment, CloudPanel, Vercel, Git and GitHub, environment and server configuration

Integrations and CMS: Zoho (CRM data, workflows, business logic) and Softr via API, VoIP CRM app, CMS management, third party APIs and webhooks

Other: Systems analysis, networks and servers, hardware and software troubleshooting, multimedia and video editing, working under pressure

PROFESSIONAL EXPERIENCE

Full Stack Developer
Apr 2023 – Sep 2026

Code Squirrel | Australia based company, remote, full time

- Built and maintained full stack web applications for client projects using Laravel and PHP on the back end and React and Next.js on the front end.
- Designed and documented REST APIs, authentication flows and role based access consumed by web front ends.
- Integrated Zoho and Softr into Laravel projects through APIs to sync CRM data, automate workflows and apply business logic.
- Deployed and maintained applications with Docker and Docker Compose on VPS servers and on Vercel, including environment configuration and production troubleshooting.
- Collaborated with team members and clients on requirements, code reviews and ongoing feature updates, and reported progress on active projects.

Science Research Assistant / Developer
Apr 2021 – Apr 2023

University of Southeastern Philippines | Davao City, Philippines

- Developed full stack research and information systems using Laravel and PHP for the back end and React JS for the front end.
- Analyzed requirements from researchers and staff and translated them into working features, data structures and user interfaces.
- Maintained and improved existing systems, fixing bugs and delivering updates.

Systems Developer

Dec 2019 – Feb 2021

Power Virtual Solutions | Davao City, Philippines

- Developed mobile applications and web systems, covering both front end and back end work.
- Built cross platform mobile apps for iOS and Android with Flutter (Dart) and React Native, connected to REST APIs with user authentication.
- Managed the company CMS and a CRM VoIP application used in daily operations.
- Designed user interfaces and user experience flows for internal and client applications.

IT Staff (Software)

Apr 2019 – Dec 2019

AYP Holdings Inc. | Davao City, Philippines

- Developed front end and back end features for company systems.
- Managed networks and servers, handled configurations and installations, and troubleshot computer hardware and software issues.
- Produced designs and promotional videos for advertising and company materials.
